

NOTICE OF OPEN HOUSE

Millar Western Forest Products Ltd. has submitted a proposal to Alberta Environment and Sustainable Resource Development to apply Vision Max herbicide (glyphosate) to approximately 1,300 hectares of existing cutblocks in Forest Management Units L02 & L03. The purpose of the treatment is to temporarily control herbaceous, shrub and deciduous competition, to improve the growth and survival of planted tree seedlings.

Millar Western invites the public to an upcoming open house, to review its proposed 2013 Vegetation Management Program. Company representatives will be on hand to discuss forest renewal efforts and answer any questions you may have.

2013 Vegetation Management Open House

Thursday, July 25, 2013, 6:00 – 8:00 PM

Main Office, Boyle Woods Products Division

Millar Western Forest Products Ltd.
